Overnight shifts and timesheet math

Check paid hours across midnight, turn minutes into decimal hours and reconcile a small gross-pay difference.

01 Split an overnight shift at midnight

A shift runs from 10:15 p.m. to 6:45 a.m. Subtract an unpaid 30-minute break. How many paid hours belong on the shift record?

Answer in hours

02 Catch a decimal-hours mistake on a timesheet

Your worksheet shows 6 hours and 45 minutes of paid work. What decimal should you enter in the hours column?

Answer in hours

03 Reconcile one missing quarter-hour on payday

Your log shows 31.75 hours. The pay stub shows 31.50 hours at a flat $24 per hour. How many gross dollars does that difference represent, before deductions?

Answer in dollars
