Rehearse a family emergency card

Describe a meeting point, find a backup contact and test whether a saved card is usable offline.

01 Make a household meeting place recognizable

Compare two labels for a family practice card. Which one could two people identify independently?

- ▢ Somewhere outside by the building
- ▢ The blue library sign beside the north entrance

02 Try a contact-card rehearsal without personal details

Using made-up names, write who a household member would contact and where to find the backup number if their own phone is unavailable.

Use fictional names for the drill

03 Check whether a contact card works offline

You are rehearsing at home and want to know whether the emergency card itself is usable without internet. Which check tests that?

- ▢ Check whether a link to a shared document opens while online
- ▢ Open the saved card on your unlocked device while it is offline
